Turtletown, Tennessee 37391**

**TENNESSEE NURSERY & LANDSCAPE ASSOCIATION**

Dear Customer,

Apalachee Nursery has been growing since 1979. We specialize in propagating and growing plants native to the Eastern United States. We use Apalachee, the Cherokee name for the North American continent, as our name.

Since we are limited in space, we concentrate on bed growing shrub liners. This gives us an opportunity to service wholesale growers who might prefer a selection of bed grown and/or container grown native shrubs available at one nursery.

We are located in a region that has one of the greatest diversity of plant species in the world. This diversity is in large part due to our high rainfall, rich soils and the combination of warm days and cool nights during the growing season. These factors also give our crops most favorable growing conditions. Our plant material is nursery propagated from seeds, cuttings or divisions. All bareroot liners are grown on raised beds in enriched soil conditions amended with pine bark, compost and/or peat moss. Apalachee Nursery is located in Zone 6 of the Southern Appalachian mountains at an elevation of 1600'.

We try to grow the best cultivars available to each plant species. We not only have those species that are easier to grow; those plants in general that can handle the wetter, tighter soil conditions; but we also try to grow the species that are more of a challenge. These include mainly plants that are members of the ericaceous (heath) plant family, in particular, the native Azaleas, which we grow in quantities, mainly from seed. Some would say that the ericates are the aristocrats of all plant families, since there are so many truly beautiful and ornamental plants within its membership. Most of the species and/or cultivars that we produce are hardy to Zone 5, Please feel free to come by and visit with us. Thank you for your interest.

**RHODODENDRON PERICLYMENOIDES\*** ZONE 4  
 Pinxterbloom Azalea: Pink blooming, multi-stemmed, very vigorous.

1 Quart	\$3.75
1 Gallon	\$4.50
3 Gallon	\$14.00

**RHODODENDRON VISCOSUM\*** ZONE 3  
 Swamp Azalea: Large upright, white blooming Azalea that likes the wetlands, but will of course, grow in the dryer locations.

Quart	\$3.75
-------	--------

**RHODODENDRON VISCOSUM\*** ZONE 3  
**“Summer Eyelet”**

Compact Swamp Azalea: Large upright, white blooming Azalea that likes the wetlands, but will of course, grow in the dryer locations. Larger blooms than species.

Quart	\$3.75
-------	--------

**VIBURNUM ACERIFOLIUM** ZONE 4  
 Mapleleaf Viburnum: Glossy Summer foliage, with creamy white bloom, turning light peachy, pink in Fall. Can be used as a screen or as a hedge. Dry woods loving plant.

Quart	\$3.75
1 Gallon	\$5.00

**XANTHORHIZA SIMPLICISSIMA** ZONE 3  
 Yellowroot: Deciduous plant that can be used as a ground cover. Here in the mountains it grows mostly on creek and branch banks in shady conditions. Will also grow in full sun, especially where the soil has been amended. A 100 plus year old planting at the Arnold Arboretum in Boston is still in excellent condition.

1-0 Seedling	\$2.00
Quart	\$3.75

**COMPTONIA PEREGRINA** ZONE 2  
 Sweet Fern: Fern-like fragrant foliage. Grows in full sun or partial shade, 2' - 4' high. Likes poor/well drained soil.

BR Liner 6"-12"	\$4.75
BR Liner 12"-18"	\$5.25

**DIOSPRYOS VIRGINIANA** ZONE 5  
 Common Persimmon: Beautiful upright, columnar tree with yellow-orange fruit. The fruit attracts most wildlife.

1 Gallon	\$4.00
----------	--------

**FOTHERGILLA MAJOR** ZONE 4  
**“Mt. Airy”**

Large Fothergilla: Selection found by Dr. Dirr at the Mt. Airy Cemetery in Cincinnati. Good Fall color.

Quart	\$3.75
-------	--------

**HYDRANGEA ARBORESCENS** ZONE 5  
 Wild Hydrangea: Native to the piedmont and mountains of the southeastern United States and has a 3" to 5" wide white bloom.

1-Gallon	\$4.00
----------	--------

**HYDRANGEA ARBORESCENS** ZONE 4  
**“Annabelle”**

Annabelle Hydrangea: Selection made at Anna Nursery in Illinois. Blooms in June and July with large white flowers. It will bloom a second time if the spent blossom is removed. Should be cut to the ground after each growing season.

BR Liner 6"-12"	\$3.75
BR Liner 12"-18"	\$3.75
1 Gallon	\$4.00

**HYDRANGEA QUERCIFOLIA** ZONE 5  
 Oakleaf Hydrangea: Spectacular plant with multi-season appeal. Probably needs soil amendment if grown in full sun, as well as a mulch. Has white conical shaped blossom in June and July, with maroon to red Fall leaf coloration and an exfoliating bark even on immature plants.

BR Liner 6"-12"	\$3.75
BR Liner 12"-18"	\$3.75
1 Gallon	\$4.00

**B&B – BALL & BURLAP**  
**BR – BAREROOT**  
 \* ERICACEOUS (Heath Plant)

**ILEX VERTICILLATA**  
**“Jim Dandy”**

**ZONE 3**

Dwarf Male Holly: Early blooming male pollinator for the compact form “Red Sprite”. Recommended to plant 1 male to 10 females for best fruit display.

1 Quart                    \$3.75

**ILEX VERTICILLATA**  
**“Red Sprite”**

**ZONE 3**

Winterberry Holly: Deciduous, compact plant that reaches 3’ to 5’ in height. Tolerant of wet soils with bright red berries that persist through to early Winter.

Quart                    \$3.75  
Gallon                    \$4.00

**ILEX VERTICILLATA**  
**“Southern Gentleman”**

**ZONE 3**

Male Winterberry Holly: Male pollinator that is a companion plant for the southern, faster growing hollies like “Winter Red.” Recommended to plant 1 male to 10 females for best fruit display.

1 Quart                    \$3.75

**ILEX VERTICILLATA**  
**“Winter Red”**

**ZONE 3**

Winterberry Holly: Deciduous plant that reaches 8’ in height. Tolerant of wet soils with bright red berries that persist through to late Winter. Performs best in wetter locations.

Quart                    \$3.75  
1 Gallon                    \$4.00  
3 Gallon                    \$14.00

**ILICIAM FLORIDANUM\***

**ZONE 6**

Florida Anise Tree: Evergreen, Fragrant, 6’ to 10’ in height. Dark green leaf color, red bloom displays, April-May.

1 Quart                    \$3.75  
1 Gallon                    \$4.00

**KALMIA LATIFOLIA\***

**ZONE 4**

Mountain Laurel: Some horticulturists say Mountain Laurel is the most beautiful of all native shrubs. It is a demanding shrub in that it requires excellent drainage, organic soil amendments and mulching to perform as it is capable. Use in mass plantings or as a specimen. Magnificent in flower. Liners and B&B have multi-plants per unit, as well as blooms. They are Pink, Dark Pink, Red and Banded.

B&B 30”-36”                    \$30.00

**MAGNOLIA TRIPETELA**

**ZONE 5**

Umbrella Magnolia: Large leafed contrast in the landscape..

1 Gallon                    \$4.00  
3 Gallon                    \$14.00

**MAGNOLIA VIRGINIANA (australis)**  
**VAR. “Apalachee”**

**ZONE 5**

Sweet Bay Magnolia: Narrow leaf, evergreen form found in Turtletown. Upright fast grower. Seedling grown; all plants are consistently evergreen. Probably the most inland, highest elevation seed source of Magnolia Virginiana.

3 Gallon                    \$14.00  
5 Gallon                    \$17.00  
7 Gallon                    \$20.00

**RHODODENDRON ARBORESCENS\***

**ZONE 4**

Sweet Azalea: A June white blooming plant with a very attractive fragrance. Will handle wetter soil conditions. These plants are from a seed source that is a compact, shrubby form.

Quart                    \$3.75

**RHODODENDRON AUSTRINUM\***

**ZONE 6**

Florida Azalea: yellow, orange, red blooming shrub that is a most vigorous plant. Grows 10’ to 12’ tall. Easy to grow.

Quart                    \$3.75  
1 Gallon                    \$4.50

**RHODODENDRON CALENDULACEUM\***

**ZONE 5**

Flame Azalea: Can bloom from yellow to blood red, but our seedlings are mostly bright orange when in bloom. Named by the plantsman, William Bartram, when he explored the southern mountains in 1776. Bartram said, “This is certainly the most brilliant flowering shrub yet known.” Used as a specimen, in a naturalized setting, or en masse. Grows to 10’-15’ tall. Likes a dryer soil.

Quart                    \$3.75

**RHODODENDRON MAXIMUM\***

**ZONE 3**

Rosebay Rhododendron: Large-leafed rhododendron, growing 15’– 20’ tall. Excellent deep shade plant, where its leaves develop to the fullest extent. Can be used as a screen. Should be installed with methods used in planting any other ericaceous plant.

Liner (clumps)                    \$6.00  
B&B 30”-36”                    \$30.00
